AMENDMENT

Sir:

In response to the office action mailed July 12, 2000, kindly enter the following amendment.

Enter amended claim 1, as follows:

- Sub E1
1. (twice amended) A method for altering the substrate specificity of an enzyme, which method comprises the steps of:
- a) introducing a DNA which comprises a copy of the gene coding for the enzyme into the Escherichia coli strain **XL1** Red or into a functional derivative,
 - b) incubating the transformed Escherichia coli strain **XL1** Red or its functional derivative to generate mutations in the enzyme gene,
